# Commercial thinking backed by quality experience

Oleic Import & Export is an Ireland-based sourcing and trading business supporting industrial buyers with food ingredients, processing materials, agricultural commodities, packaging materials, equipment and logistics solutions.

## A QUALITY-LED PERSPECTIVE

Our founder, Khalid Mohammed, is a quality professional with experience in edible-oil quality control and production environments. He holds a Master of Science in Food Science and Engineering from Jiangnan University in China. This background helps Oleic translate technical requirements into clearer supplier enquiries, document checks and commercial decisions.

### 01 Specification first

We begin with product, grade, application, quantity, packaging and destination.

### 02 Focused sourcing

We approach suitable manufacturers or distributors against the written requirement.

### 03 Document visibility

Available COA, TDS, SDS, origin and compliance documents are requested before commitment.

### 04 Practical coordination

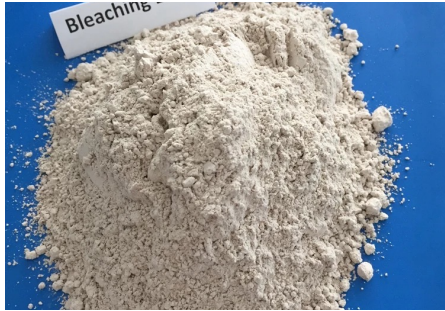

Clear communication across quotation, sampling, order and shipment stages.

## Our purpose

Make cross-border sourcing clearer, more responsive and easier to manage for buyers and supply partners.

# A focused range for trade and industry

Products are sourced against the buyer's specification, quantity, destination and documentation requirements.

01

## Agro-food commodities

Peanut kernels and splits, peanut cake or meal, white and red sesame, watermelon seeds, pigeon peas, chickpeas, dried hibiscus, gum Arabic and selected dates.

02

## Edible-oil materials

Bleaching earth, antioxidants, antifoam and selected processing aids for buyer-approved applications.

03

## Food ingredients and chemicals

Corn starch, caustic soda and selected phosphoric or citric acid grades subject to specification.

04

## Tinplate steel

Tin-coated steel coils and sheets for cans, closures and other metal-packaging applications.

05

## Machinery and laboratory

Processing and packaging equipment, laboratory instruments, glassware, reagents and consumables.

06

## Packaging and logistics

Flexitanks, packaging materials and coordinated freight support for suitable products and destinations.

Project-based enquiries outside this portfolio are welcome and reviewed against a written requirement.

# Clear information for better buying decisions

Every enquiry is handled against the intended application. The examples below are not substitutes for an approved specification.

## AGRICULTURAL AND FOOD

Buyer specifications may cover crop year, size, colour, purity, moisture, oil or protein content, aflatoxin or residue limits, microbiology, packaging and destination certificates.

## PROCESSING MATERIALS

Technical requests may include grade, assay, active ingredient, application, dosage, impurities, food status, shelf life, storage, pack size and safe-handling information.

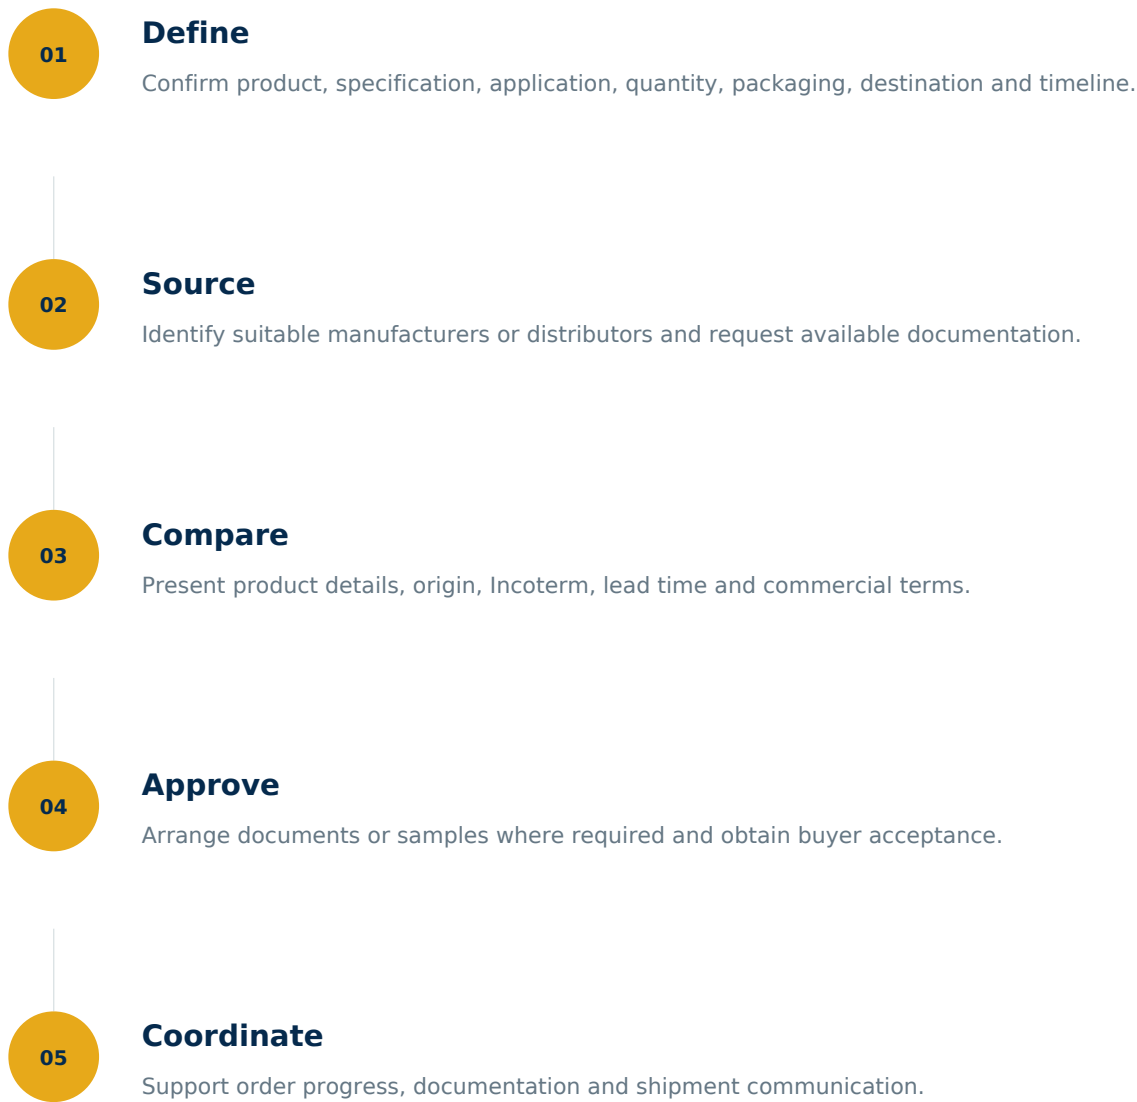

## INDICATIVE SUPPLY CONTROLS

- |    |                  |                                                                      |
|----|------------------|----------------------------------------------------------------------|
| 01 | <b>PRODUCT</b>   | Name, grade, intended use and approved-brand restrictions            |
| 02 | <b>QUALITY</b>   | Specification, batch COA and agreed test limits                      |
| 03 | <b>PACKING</b>   | Pack size, material, labelling and pallet requirements               |
| 04 | <b>DOCUMENTS</b> | TDS, SDS, origin and applicable declarations or certificates         |
| 05 | <b>DELIVERY</b>  | Quantity, Incoterm, destination, timing and freight responsibilities |

Final product suitability, regulatory acceptance and technical approval remain with the buyer and the applicable destination requirements.

# From requirement to coordinated delivery

A controlled process connects technical suitability, commercial terms and shipment requirements.

| TECHNICAL                   | COMMERCIAL                 | LOGISTICS                    |
|-----------------------------|----------------------------|------------------------------|
| Specification and documents | Clear quotations and terms | Packing, freight and updates |

# Start with one clear requirement

Send your current product specification or purchase enquiry for a focused sourcing proposal.
